Peer (*pēr*), *v.*[2] Also 6–7 peere, (8 pier). [Known from *c* 1590: of uncertain origin and history.]

Exactly the same sense as 2 below was expressed in the suffix by Pier *v.* 1599. = LG. *pieren*; mod. *peer* has accordingly been assumed to be merely a later form or spelling of *pier*. But, besides that there was a clear chronological gap between the two words, *peer* is not a phonetic development of *pier*, and cannot, in fact as it is at present known, be formally identified with that word; whether there was any irregular or elliptic connexion does not appear. In 15–16th c., *peer*, *pere*, were also ordinary spellings of Pere *v.* = *appear*; and, in many instances (see senses 2, 3 below) the use of *peer* seems so close to that of *pear* (*appear*), that it is difficult to believe that there was not some blending of the two words, attributable to the fact that when *peer*, to look out, is said of inanimate things, the meaning is that *story appears* as if they were looking out. In several of the Shakspearian uses of *peer* it is difficult to determine whether the things are thought of as looking out, or as just appearing.]

Pelican (pe·lĭkăn). Forms: 1–7 pellicane, 3–8 -ican, (3 -yconn(n, 6 -ycane, pillycane); 4– **pelican,** 7 pelicone, -econe, 7–9 pelicane. [Like F. *pélican* (1120 in Hatz.-Darm.), Pr. *pelican*, Sp. *pelicano*, It. *pellicano*; ad. late L. *pelicān-us*, more correctly *pelecānus*, ad. Gr. πελεκᾶς, applied by Aristotle (in part at least) to the pelican (τὸ πελεκᾶνες οἱ δι τοῦ καταρακτὴν γενόμενοι); 2775 closely related to πελεκάς, -άδος woodpecker, perh. f. πέλεκυς to hew or shape with an ax, πέλεκυς ax, hatchet, from the appearance or action of the bill.

Hebrew was also used by the LXX to render the Heb. קָאַת *qā'ath*, in two or three of the places in which it occurs (in Eng. versions 'pelican'): in the two others, Isa. xxxiv. 11, Zeph. ii. 14, different Greek words were used, and there the version of 1611 has 'cormorant', but the Revisers of 1885 restore 'pelican' as in Coverdale.)

1. The bird.

1. The name now appropriated to a genus, *Pelecanus*, of large gregarious fish-eating waterfowls, remarkable for an enormously distensible membranous pouch which depends from the lower mandible of the long hooked bill and is used for the storing of fish when caught. Two species, *P. onocrotalus*, the Common or White Pelican, and *P. crispus*, the Crested Pelican, are found in Southeastern Europe and adjacent regions, and are the original 'pelicans'; to these the North American species *P. trachyrhynchus* is very closely allied. Other species are found in the West Indies, Africa, India, the Malay Archipelago, and Australia.

...In all the quotations down to 1562–3, and many later, the spelling is single; in 1599 the word is first written in England, and the word merely a reflex of *pelicanus* of the Vulgate in Ps. ciii. 7; *pellicano solitudinis* 'the pelican of the wilderness', which was not the Greek or Hebrew, but in the Old Latin of the Psalter and other places where the Vulgate has *onocrotalus*, q. v., name of the modern pelican'. Elsewhere (Const. in *Sophon.*, ep. ad Vitalem VI. 295) St. Jerome makes two kinds of *onocrotalus*, one the water-bird, the other that of the wilderness ('onocrotalum, alterum aquarum, alterum squalidi, atrati solitudinis'). In Isaiah xxxiv. 11, vii. 31, ... These appear in the pseudo-Jerome *Brev. in Psalt.* (Villarsi VII. Appx. 30) as two kinds of *pellicanus* (now identified with onocrotalus), whereas, ultimately, in Tertius, 1908, 1908 below.

Pendulum (pe·ndiŭlŏm). Pl. **-ums**, formerly (rarely) **-a.** [a. mod.L. *pendulum* (1645 in Watt *Bibliotheca*), sb. use of neut. of L. *pendul-us* PENDULOUS, lit. a pendulous or free-hanging body; tr. It. *pendolo* (Galileo *Operazioni Astronomiche*, 1637).]

1. A body suspended so as to be free to swing or oscillate; usually, an instrument consisting of a rod, with a weight or *bob* at the end, so suspended as to swing to and fro by the action of gravity, and used for various mechanical and scientific purposes; esp. as an essential part of a clock, serving (by the isochronism of its vibrations) to regulate and control the movement of the works, so as to maintain a constant rate of going, and enable it to keep regular time.

Mech.* xxvi. 201 We thought it not amiss to try if a Pendulum would swing faster, or quicker swinging longer in our Receiver. *Ibid.* xxxvii. 316 We conveyed into our Receiver ... the Pendulo formerly mention'd. c1677 Hale *Prim. M. Clerke in *Enquire, Read.* X. 317 The experimental verification of this fact led Sir (Galileo) to the important discovery of the isochronism of the pendulum.

b. With qualifying word.

Compound pendulum, (a) a pendulum consisting of a number of weights or *bob* (*bobs*); an actual material pendulum, regarded theoretically, as opposed to a *simple pendulum* (see below); (*b*) a compensation pendulum whose rod consists of bars of different metals. **Conical pendulum**, a pendulum so contrived that the bob revolves in a circle, the rod thus describing a cone. **Reversal** (or **Quicksilver pendulum**), a compensation pendulum with a cylindrical bob containing mercury, whose upward expansion by heat counteracts the lengthening of the rod. **Seconds pendulum**, a pendulum of such a length as to oscillate once every second; a pendulum 'marking seconds'. **Simple pendulum**, (*a*) a theoretical or ideal pendulum consisting of a particle having weight but no magnitude, suspended by a material inextensible rod, and moving without friction; (*b*) a pendulum consisting simply of a bob suspended by a cord or wire, without any special contrivance, as for compensation of the effects of heat; (*c*) a pendulum unconnected with any mechanism. **Spherical pendulum**, a pendulum so contrived that the bob moves to any circle on a given spherical surface (the same as *conical pendulum*). (*b*) In a microscope: Power of the object-glass to give distinct vision for some distance both beyond and within its exact focus.

It appears that the name was first given to the Great Auk or Gare-fowl of the seas of Newfoundland, still called in F. *pingouin* or *pingoin* (1600 in Hatz.-Darm.). But it was soon applied also to the birds now called *penguins*, in F. *manchots* (found by Drake at Magellan's Straits in 1578), which have a general external resemblance to the northern bird, though, in the opinion of zoologists, widely removed in structure. (Note. One earliest examples of the name *penguin* are due to Hakluyt. His account of Hore's Voyage to Cape Breton was taken down by him some fifty years after the event, from the mouth of Thomas Ellis, a survivor of the voyage. If we could be sure that the name 'Penguin Island' dated back to 1536, this would be the earliest occurrence of the word, as it is certainly the earliest English notice of the bird. Ingram's Gareware, if reliable, would be evidence for the name in 1580-1; but his tale is discredited, and is thus evidence only that he had heard of the penguin by 1589. But years later than Farthorpe's letter to Hakluyt. The sentence first found by Drake on by Magellanes before him at Magellan's Straits, is fully described in *The World Encompassed by Sir Francis Drake*, published by his nephew in 1628, 'out of the Notes of Mr. Francis Fletcher', Drake's chaplain (ed. Hakl. Soc., 1854, p. 178), but we cannot be there given to it. The same account, however, in a MS. of 1577, seemed to be a transcript of Fletcher's original Notes of 1578: 'Herein were the number of fowles, which the Welsh men named Penguin, and Magellanes named them geese' (*ibid.* p. 170); but the absence of the name from the printed work of 1628, and from three other MSS.'s accounts of the voyage (*ibid.* Appendix 419, 431, 441), in which the bird is described, makes the occurrence of penguin in Fletcher's original Notes somewhat doubtful. The name certainly occurs in the narrative of Candish or Cavendish, 1588; though his statement that Drake named one of the isles 'Penguin Island' is at variance with that of the eye-witnesses Fletcher and Wiggs (*ibid.* p. 255), who both state that he named it *St. George's Island* 'in honour of England'. The occasion of the name *penguin* is 'the Welsh men', and its explanation as Welsh *pen gwyn* 'white head', appears due to Ingram, and later to Sir Thomas Herbert's Travels.—In all, 1634 to a certainty, to all, 1638 as an accepted fact. But, besides that the Great Auk had not a white head (though it had white spots in front of the eyes), there are obvious historical difficulties, which some would remove in part by supposing the name to have been originally given by Welsh fishermen. Other suggestions that the name is derived from L. *pinguis* 'fat', or is an alteration of 'pen-wing', referring to the rudimentary wings, are merely unsupported conjectures.)

Penn'orth, colloq. contraction of Pennyworth.

Pennutte, obs. form of Pennet.

Penny (pe'ni), Pl. **pennies** (pe'niz), **pence** (pens). Forms: see below. [OE. *pening, pending, penning*, later *penig* = OFris. *penning, penneg*, -*ig*, OS. *pending* (MLG., LG. *penning*), MDu. *penninc, -ing-*, also *plant(e)ing* Du. *penning*), OHG. *pfenning* (*phantlin, phanting*), *pfenting* (MHG. *pfenninc, -ig, -ig-*, Ger. *pfennig*), ON. *penningr* (mod. Icel. *penningr*, Sw., ODa. *penning*, Da. pl. *penge* = ON. *pengar* 'money'); not recorded in Goth. (which has *skatts* for *hardpas* in N. T.). In early ME., Ormin had still *penninng*; but the usual ME. form after 1200 was *penī, peny*, from OE. *penī*. The forms with double *n* in OE. were chiefly Northumbrian; in ME. *pennie, penny*, with *en*, was 1250, not used till the 15th c. OE. and early ME. had also, less usually, like OFris., forms in *pan-*. In ME. the plural *penegas, penegas*, passed through *panes, pannes, penāis, penis*, to the 14th c. *pens, pens*; the latter duly spelt in 16th c. *pence*. But, besides this, the fuller *penyes, penyes, pennies*, continued in restricted use: see the forms in A. 2 β, and signification in B. 1 c.

The OE. and cognate forms point back to the types **pannig*, **pannin*, a metal which does not occur (Goth. **panning*, a metal which does occur, is only glossatic for, but suggests that the word was formed and of manifold form. But it was evidently of W.Gm., or even earlier the ON. was borrowed from OE.) of Common Germanic age. No foreign source however is known; and the suffix *-ing*, occurring in other names of coins, as *shilling*, *farthing*, (OHG. *scilling*, etc.), suggests at least a Teutonic formation on a radical element *pand* or *pann*-. This has been sought in W.Gm. **pand*, OHG. *pfant*, Pawn, with reference to a possible use of the *pawning* and in W.Gm. *pannus*, Ger. *pfanner* Fish, with possible reference to shape. Of these words themselves the Germanic origin is uncertain.]

† **Pentalpha** (pentă·lfă). [a. Gr. πεντάλφα, a syncopic of πενταγράμμον PENTAGRAM, f. πέντε five + ἄλφα the letter Alpha or A; from its presenting the form of an A in five different positions.] = PENTAGRAM, PENTAGRAM 1.

Pentamerous (pentă·mĕrŏs), *a.* [f. PENTA- + Gr. μέρος part + -OUS.] Having, consisting of, or characterized by, five parts or divisions.

1. *Bot.* Having the parts of the flower-wheel five in number. (Often written 5-merous.)

1835 Lindley *Introd. Bot.* (1848) I. 308 *Pentamerous*, if a flower consists of organs in fives. 1857 Hanbury *Elem. Bot.* 222 Trees or shrubs with...an imbricated 5-merous calyx and corolla. 1879 Darwin in *Academy* 22 Jan. 59/1 The four organs of Scrophularineæ and Labiatæ are referred by some botanists to a deficiency from the pentamerous type.

2. *Zool.* a. Consisting of five joints, as the tarsi of certain insects; also applied to such insects themselves, as the beetles of the group *Pentamera*. b. Having five radiating parts or organs, as a star-fish or other echinoderm.

1826 Kirby & Sp. *Entomol.* III. xxxv. 289 Pentamerous insects are those which have five joints to all their tarsi. 1848 *Ibid.* IV. xlvii. 306 *Tarsi* pentamerous. 1852 Baird-Dana *Amer. Encyl. Introd.* 193 Echinodermata. Animals...which...combine with a radial and, ordinarily, pentamerous arrangement, traces of a bilateral symmetry.

So **Penta·meral** *a.* = prec.; **Penta·merus**, a pentamerous beetle (see 2 a, above); **Pentamere** (-mēr), each of the five divisions of a pentamerous animal; **Penta·merism**, the condition or character of being pentamerous; **Penta·meroid** *a.*, allied to the extinct genus *Pentamerus*, of the family *Pentameridæ* of brachiopods, having somewhat pentagonal shells; *sb.* a brachiopod of this family.

Pentameter (pentæ·mĭtĕr), *sb.* and *a.* *Pros.* [a. L. *pentametr-on* sb., adj. Gr. πενταμετρον adj. consisting of five measures, sb. a verse or line of five measures; f. πεντε- five + μέτρον measure. Cf. F. *pentamètre* sb. (c 1500 in Hatz.-Darm.).]

A. *sb.* A verse or line consisting of five feet.

1. In Greek and Latin prosody: A form of dactylic verse composed of two similar halves (*penthemimers*), each consisting of two feet and a long syllable (thus equivalent to a dactylic hexameter with the second half of the third and of the sixth foot omitted); in the first penthemimer each of the two feet may be either dactyl or spondee, in the second they must both be dactyls. Most commonly used in alternation with hexameters, constituting *elegiac* verse: see ELEGIAC A. 2.

The name arose from a mistaken analysis of the verse as two dactyls (or spondees), a spondee, and two anapæsts.

1589 Puttenham *Eng. Poesie* I. xxiv. (Arb.) 84 *Elegia*... was in a pitious matter of mourne, placing a limping Pentameter, after a lusty Exametar, which made it go distastefully more than any other measure. 1595 Webbe *Eng. Poesie* (ed. 2) 3 Certain Latin words should be framed in the form of hexameters or pentameters: and this may be done by those who know nothing of Latin or of verses. *c* 1600 Chapman *Mus. Poems, Elegy Marlow.* [Example] In the hexameter rises the fountain's silvery column; In the pentameter aspires Higher and higher its feathery spray, as in melody lasts. 1634 Bacon *Confess. Faith* iv. 364 The closure of the Latin pentameter is enhanced by the rhyming of the last syllables of the two penthemimers.

2. Applied to lines of verse consisting of five feet in other languages; e. g. the English 'heroic' or iambic verse of ten syllables.

1708 A. Stevens *Temple Mus.* vi. 224 Odes and Hymns... in several kinds of Verse...some were Pentameters. 1740 *Finger Post Numbers* 39 The Cæsura falling constantly on the fourth Syllable in the English Pentameters or Heroicks, creates a dull Uniformity in the Flow of the Verse. 1888 Browne *Messianic Prophh.* xi. 340 The pentameters are quite frequently the divine name Jehovah Zebaoth.

B. *adj.* (Now *attrib.* use of *sb.*) Consisting of five metrical feet; having the form of a pentameter (see A.), esp. of the dactylic pentameter.

1548 *Lambert Fol. Virg. Da Introit.* i. viii. 11 Of the number of the feet, as Exametar and Pentametar which is also called Elegiacal. 1580 J. Warton *Sch. Pipe* v. D. 111 Like Ovid's Muse, in hexameter and pentameter verse.

1832 Edinburgh Lett. & Sci. Advert. Pref. 9 Away Wits (Rebel) III. 131 Those weary pentameter tales of Dryden and others.

Hence **Penta·metered** *a.*, written in pentameters; **Penta·metrist**, a writer of pentameters; **Penta·metrize** *v. trans.*, to make into, or like, a pentameter.

1599 *Passion. Hon. Vill* 4 (1866) 3 This verse blush'd to be numbered and pentametred verse. 1803 Times (*Spencer's Wks.* I. p. xxii. note, English hexameters and pentametres. a 1823 *Fenny Dooley, Progym.* (1848) 204/2 Horace has been made to say the same thing by the insertion of an apt word which pentametrizes the verse. 1898 W. Gr. πεντα- five + ἀνδρ-, stem of ἀνήρ man, male, taken in sense 'male organ', stamen: see Hexandria.] The fifth class in the Linnæan Sexual System, comprising plants having five stamens not cohering. So **Penta·nder** (*rare*) [F. *pentandre*], a pentandrous plant; **Penta·ndrian, Penta·ndrous**, and, (usually) **Penta·ndrous** *adjs.*, belonging to the class *Pentandria*; having five free stamens.

1. A name of Hellenistic origin for the Jewish harvest festival (called in the Old Testament the Feast of Weeks) observed on the fiftieth day of the OMER (q. v.), i. e. at the conclusion of seven weeks from the offering of the wave-sheaf, on the second day of the Passover.

The first day of the Passover is always the 15th Nisan; this ends Nisan is the First Day of the Omer or wave-offering; seven weeks from which, on the 6th Sivan, is the Feast of Weeks. Thus, in 1900, the 16th Nisan coincided with Sunday 15th April, and the 6th Sivan with Sunday 3rd June, which were also that year, Easter Sunday and Whit-Sunday; but the Jewish festivals, being regulated solely by the moon, may fall on any day of the week: see 1 ESDRAS *Apocr.* Rom. L. *appendicium* as appendage, f. *appendere* to hang something on another, to attach in a dependent state. As a small building, erected as a 'lean-to' to another, has usually a roof with one slope only, the word was evidently from an early period (esp. in the aphetic form) associated with F. *pente* slope, declivity, 'hang', which became at length a regular element of the sense; hence the later popular etymology *pent-house* for *pentis* : cf. *worst-house*, vulgarly *morbis*.

The OF. *apendis* and *apentis* appear to represent L. *appendicium* and **appendicium*. But the early history of the word offers difficulties, esp. that in OF. the short forms without *a-* are very rare, while in Eng. they are the earliest, *appentis* not being known before Caxton.]

In this sense *people* has in colloquial use taken the place of *man* ('men say', etc.); but in early ME. *the people* (= F. *l'on*) seems to have had a similar use.

Per, obs. f. Fear *sb.*; var. Fear *v.* Obs.

Per (pəɹ), *prep.* A Latin (Hal. and Old French) preposition, meaning 'through, by, by means of'; in med.L. and Fr. also in a distributive sense = 'for every..., for each...': used in Eng. in various Latin and Of. phrases, and ultimately becoming practically an Eng. preposition used freely before substantives of many classes.

I. In Lat. phrases (including med.L. and Italian).

b. In *Logic* applied to conversion in which the quantity of the proposition is changed from universal to particular: see Conversion 4.

Called by Boethius *Categoriæ per accidens*, because the particular affirmation in this case serves indirectly as converse to a universal affirmation with whose subaltern particular it is directly (*per accidentem*) convertible. Aristotle's term was κατὰ μέρος and *e per* = 'conversion so to a part' implies only part of the statement is converted.

[1563 Boethius *de Syllogismo Categorico* I. (ed. Basil. 1570) 250 *Per accidens* autem converti dicimus particulare affirmatiue universali affirmantem, quia particulare affirmatiue sibi sub ipsi principali conuertitur.] 1697 T. Comp. *Boeth. Treat. 2. Through and through, thoroughly, completely, to completion, to the end: with verbs (and derivatives), as *perfidious* to do thoroughly, complete, PERFECT, *pervadere* to change throughout or completely, PERVADE, *perpetrare* to PERPETRATE, *perturbare* to PERTURB; so PERCEIVE, etc.

3. Away entirely, to destruction, 'to the bad': with verbs (and derivatives), as *perdere* to do away with, destroy, lose (PERDITION), *pertire* to go to destruction, PERISH, *pervertere* to turn away evil), PERVERT, *persimilis* to take away entirely, destroy, annihilate (PERNICIOUS).

4. Thoroughly, perfectly, extremely, very: with adjs. and advbs., as *percalidus* very sharp, PERACUTE, *perdiligens* very diligent, PERDILIGENT, *perfacetus*, PERFACETE. Formerly also in Eng. with derived (or their analogues), in sense 'very great', 'extreme', as *perdiligent*, *permalicious*.

II. In *Chemical* nomenclature. (From 4 above.)

5. Forming sbs. and adjs. denoting the maximum (or supposed maximum) of some element in a chemical combination; esp.

a. With names of binary compounds in *-ide* (formerly *-oxer*), designating that in which the element or radical combines in the largest proportion with another element, e. g. PEROXIDE, PERCHLORIDE (†*perchloret*), PER-IODIDE, PERSULPHIDE (†*persulphuret*), *q. v.* Also **perbromide** (†**perbromuret**), a compound of bromine with another element or radical, in which the bromine is present in larger proportion than in other compounds; so *percyanide* (†*-cyanuret*), *perphosphide* (†*-phosphuret*), etc. Hence in derivative verbs, etc.: as PEROXIDIZE, *-IZATION*, *perphosphuretted*, etc.

This use of *per-* was introduced in 1824 by Dr. T. Thomson, in his *System of Chemistry*, ed. 2, for combinations of oxygen with a metal, *peroxide* being used to indicate 'that the metal is thoroughly oxidized', or 'combined with as much oxygen as possible'; see PEROXIDE. It was subsequently extended to combinations of other elements, as PERCHLORIDE, etc. In strict chemical nomenclature names in *per-* have been to a great extent superseded by those with more definite numerical prefixes as *-ic*, *peroxide of manganese* by *manganese dioxide*), or by others in which the constituents of the substance is differently expressed (e. g. *perchloride* and *peroxide of iron*, by *ferric chloride*, *ferric oxide*). But the *per-* compounds are retained in some cases, especially in pharmacy and popular use.

b. With adjs. in *-ic*, naming oxides, acids, etc., designating that compound which contains the greatest proportion of oxygen (and, consequently, the least of the element named), as **perbromic acid**, hydrogen perbromate, $HBrO_4$; **perchromic acid**, $H_2Cr_2O_5$; **peric acid**, iridium trioxide, IrO_3; **periodic acid**, HIO_4; **pero-mole acid** (= *acide*), CuO_3; **permolybdic acid** (= *acide*), K_2MoO_4, etc. See also PERCHLORIC, *-IODIC*, *-MANGANIC*, etc. Also in names of the salts of these acids, and analogous bodies, as PERCHLORATE, *-IODATE*, *-MANGANATE*, *-SULPHATE*, *q. v.*; *perchromate*, *peric-diate*, *peroxotrate*, *perphosphate*, *permolybdate*, etc.

Many of these also are now obsolete for names otherwise formed: e.g. peroxide of iron, of mercury, now ferric and mercuric nitrate.

Formerly per- was also prefixed to adjs. in *-ous*, where *hypo-* is now used, as *perchlorous* = HYPOCHLOROUS; so *perazotous*, *perphosphorous*.

6. In strict philosophical language (first brought into prominence by Reid): The action of the mind by which it refers its sensations to an external object as their cause. Distinguished from *sensation, conception* or *imagination*, and *judgment* or *inference*.

1780 LORD KAMES *Elem. Crit.* III. 370 External things and their attributes are objects of perception: relations among things are objects of conception. 1785 REID *Intell. Powers* I. i. (1849) 28 The perception of external objects by our senses, is an operation of the mind of a peculiar nature, and ought to have a name appropriated to it. ... I know no word more proper to express this act of the mind than perception. *Ibid.* 29 We are never said to *perceive* things, of the existence of which we have not a full conviction. ... Thus *perception* is distinguished from *conception* or imagination. Secondly, Perception is applied only to external objects, not to those that are in the mind itself. ... Thirdly, Perception is distinguished from *consciousness*. Thirdly, The immediate object of perception must be something present, and not what is past. We may remember what is past, but do not perceive it. ... And thus it is distinguished from remembrance. In a word, perception is most properly applied to the evidence which we have of external objects by our senses. But ... the word is often applied by analogy to the evidence of reason or of testimony, when it is clear and cogent. 1840 MILL, *Diss.* & *Disc.* (1859) II. 51 The writer who first made *Perception* a word of mark and likelihood in mental philosophy was Reid, who made use of it as a means of flagging several of the questions in dispute between him and his antagonists. 1840 Sir W. HAMILTON in *Reid's Works* I. 280/2 Accordingly, as to *different senses*, the subjective or the objective element predominates, we have sensation or perception. 1843 MILL *Logic* v. xi. § 3 Besides the affection of our bodily organs from without, and the sensation thereby produced in our minds, many writers admit a third link in the chain of phenomena, which they call a Perception, and which consists in the recognition of an external object as the exciting cause of the sensation. 1855 MRS. CARLYLE *Lett.* (1883) I. 246 Every perception translates this double chance of sensation and intuition,—the objective and subjective factor in cognition. 1856 FERRIER *Inst. Metaph.* v. v. 140. 2 1867 WALLACE *Contempl. Under the latter limitation it has been found convenient to make a further restriction, and to distinguish between immediate proper and perception proper. 1898 MACKENZIE *Physiol. Mind* 70 *Perception* includes not only the external feeling, but the reference of it to an external cause. 1889 *J. Sully Outlines Psychol* vi. 230.

3. Qualifying a statement so as to express possibility with uncertainty: It may be that; maybe, haply: = Peraventure *adv.* 3, Percase 3, Perhaps 1. Used **a.** with the subjunctive mood or its equivalent (perchance there may, might, would be?); **b.** with the future indic. (perchance there shall or will be); **c.** with the pres. and past tenses indic. (perchance there is, was, has been, etc.).

In a, the statement is already contingent, and *perchance* may be taken, as in 1 and 2, in its literal sense of 'by chance', 'there may, might, would be chance for'; but in c, the statement is made contingent by *perchance*, and we cannot there substitute 'by chance', the meaning being 'is any chance to be the fact that there is, was, or has been'. This is also true of b., but there the event itself being future and so subject to contingency, the use of 'perchance' is somewhat transitional between a. and c. The loss of the subjunctive inflexion in Eng. and the levelling of this mood in form under the indicative, makes some early examples, esp. of the past tense, doubtful between a. and c.: thus 'perchance they had' might mean 'perchance they might have had', and it may have been in this way that a phrase originally = I., *forte* has come to be used as = *forsitan*. Cf. also the development in 'it may be that he is here', 'may be he is here', and (dial.) 'he is maybe here'.

b. *Med.* The action of striking or tapping with the finger, or with a small hammer (*plessimeter-hammer*) upon a part of the body, either to ascertain the condition of some internal organ by the sound produced, or for therapeutic purposes.

If the stroke is made directly upon the body, it is called *immediate percussion*; if upon something placed against the body (e. g. a finger of the other hand, or a small instrument made for the purpose), *mediate percussion*.

1832 J. FORBES *Laennec's Dis. Chest* (ed. 4) 401 Percussion of the thorax yielded a much clearer sound on the right than on the left side. 1843 R. J. GRAVES *Syst. Clin. Med.* Introd. c. *Instrument of percussion*: a musical instrument that is played by percussion or striking.

Mostly applied to those used chiefly or solely for marking rhythm, and either struck with a stick or the hand (as the drum, triangle, tambourine), or struck together in pairs (as cymbals); rarely to stringed instruments in which the strings are struck by hammers. Hence *percussion* is sometimes used collectively for the instruments of percussion in an orchestra, or their players (cf. STRINGS, WIND, sound).

Mus.* (1789) I. 249 Musical instruments chiefly of percussion. 1838 *Penny Cycl.* XII. 398 *Instruments, Musical*, are, 1. *Aerial*, as the Organ, Piano-forte, etc.; 2. of *Percussion*, as the Drum, Cymbals, etc. 1904 *Daily News* 25 Feb. 8/3 Almost all the strings are gentle in the conductor, and the wind and percussion are prominent members of London orchestras.

d. A device in some reed-organs by which a small hammer is caused to strike the reed as the air is admitted to it, thus quickening the production of the sound.

1879 A. J. HIPKINS in Grove *Dict. Mus.* I. 667 Another major invention was due to Martin, who gave the harmonium ...'spinner speech', i.e. made the sound cease quickly follow the descent of the key. The invention is known as 'percussion'.

3. *Mus.* The actual 'striking' or sounding of a note or chord, esp. of a discord, as distinguished from *preparation* and *resolution.*

1880 C. H. H. PARRY in GROVE *Dict. Mus.* II. 689 *Percussion*, is the actual sounding of the discord.

Peri (pē·rī). [mod. adl. (cf. Fr. *péri*) Pers. پری *pārī* or *pārī*, in Pahlevi *parīk* evil genius, malevolent elf or sprite, Avestan (Zend) *pairikā* one of several beautiful but malevolent female demons employed by Ahriman to bring comets and eclipses, prevent rain, cause failure of crops and dearth, etc.; in mod. Persian, poetically represented as a beautiful or graceful being (*cf. fairy* in Eng.); hence such combinations as *pari-rū* 'fairy-faced', *pari-paykar* 'fairy-formed', etc. (But the word has no etymological connexion with *fairy*.)]

In Persian Mythology, one of a race of supernatural beings, originally represented as of evil or malevolent character, but subsequently as good genii, fairies, or angels, endowed with grace and beauty. Hence *transf.* 'a fair one'.

Peri, *obs.* form of PERAI, South American fish.

Peri-, *prefix*, repr. Gr. περί prep. and adv. 'round, around, round about, about', combined in these senses with verbs and their derivatives, substantives and adjectives; (*a*) in adverbial construction, as περιβλέπω to look around, περιστρέφω to turn round, περίειμι a going round, περίνεως walking about, περιχρίω gilded all over; from the sense 'all over', it was an easy extension to those of 'altogether, quite, very, exceedingly, beyond measure', as in περικαλλής right beautiful, very beautiful, and that of 'going beyond' or 'exceeding', as in περισσεύω to overshoot. (*b*) In prepositional construction, forming parasynthetic adjs. and derived sbs., e.g. περιήμενος 'situated περί περίῳ, around or about the heart', thence τὸ περιήμενον 'the membrane surrounding the heart, the pericardium'.

A small number of technical Greek words in περι- were adopted in ancient Latin; more were added in late and mediæval Latin; most of these are represented in the modern Romanic langs., and in English (see PERIARTHRUM, PERICARP, PERIOD, PERIPATETIC, PERIPHERY, PERIPHRASIS, PERIPLUS, PERISTYLE, PERITONEUM); and, on the model of these, adaptations of ancient Greek compounds in περι-, and new compounds from Greek elements (frequently also from Latin elements), have been introduced in great numbers in modern scientific Latin (esp. in biological nomenclature), and in the scientific terminology of the modern languages generally, in which *peri-* has been found to be a convenient prefix for denominating the structure or region lying round a defined organ or part. Most of these terms are (with the appropriate modification of form) of international currency, and it is often difficult to ascertain in which of several languages a particular term was first used.

The more important *peri-* words (including those of historical standing, and those in more or less general use) will be found in their alphabetical places; others of less importance or more exclusively technical use follow here.

1. In numerous scientific terms, chiefly anatomical and pathological.

In these *peri-* has a prepositional relation to the sb. implied in the succeeding element (see (*b*) above).

1. A structure surrounding, or forming the outer part of, a flower; a floral envelope.

† **2.** In earlier use, a synonym of Calyx: and, like it, applied also to an Involucre or whorl of bracts, as that at the base of the flower-head in the *Compositæ*. *Obs.*

3. Now, The outer part or envelope of a flower, which encloses the essential organs (stamens and pistils); either *double*, i.e. the calyx and corolla collectively, esp. when so much alike as to appear to constitute a single part; or *single*, when there is only one, which may be either green (*sepaloid*, like an ordinary calyx, or coloured (*petaloid*) like an ordinary corolla.

Chron.* 8 Feb. 176/1 The Perianth segments are...

c. In Dicotyledons, a leafy or membranous covering surrounding the archegoniate; in mosses, the cluster of leaves surrounding the sexual organs in the 'flower'.

1857 Henfrey *Bot.* § 320 (Hepaticæ) The vaginula...the circle of leaves, often confluent, surrounding it, form the perigone, perianth or involucel. 1866 *Treas. Bot.* 883 (In Liverworts) the involucres and perianth consist sometimes of the same plant. 1874 Bennett & Dyer in *Seeds' Bot.* 292 Besides the envelopes just named (pericladium, etc.), there is often (as in Hepatica (but not in Mosses) a so-called *Perianth*, which grows as an annular wall at the base of the archegoniam, and finally surrounds it as an open sac.

2. *attrib.* and *Comb.*, as *perianth-leaf*, *-segment*, *-tube*, *-whorl*.

Perjury (pə·ɹdʒĭɹĭ). Also 5–6 **par-**. [a. AF. *perjurie* (mod. OF. *parjurie*); in med.L. *perjuria*, ad. L. *perjūrium* false oath, oath-breaking, f. *perjūr-are* to PERJURE.]

The action of swearing to a statement which is known to be false, or of taking an oath which it is not one's intention to keep; *spec.* in *Law*, The crime of wilfully uttering a false statement or testimony in reference to a matter material to the issue involved, while under an oath or affirmation to tell the truth, administered by a competent authority; the wilful utterance of false evidence while on oath.

In legal usage, perjury was first the offence of jurors in giving a wilfully false verdict, they being sworn to give a true verdict according to their knowledge; as an offence of witnesses it was apparently gradually evolved in connexion with the change in the manner of Trial by Jury (q. v.): there is no trace in the statutes, or in the reported proceedings of the courts, of any penal law against perjury in witnesses, so distinguished from that of jurors, earlier than the reign of Henry VIII (*Pioneer Quar.* XVII. 432/2); but see quot. 1351. In this 2nd "false statement" appears to be the equivalent of 'perjury' in the modern sense.
